Washington Women In Need (WWIN) www.wwin.org
Assists Washington State women who qualify with financial support for non-covered dental care and education expenses

 Ceridian Cares Financial support www.ceridiancares.com

Family Planning Statistics

- At least 35% of pregnancies in Washington are unintended. Nationally, that number is nearly 50%.
- In the opioid using population (prescribed and illegal), 86% of pregnancies are unplanned.
- If current trends continue, more than half of all women in the United States will experience an unintended pregnancy by the time they reach age 45.
- In 2010, 52% of unintended pregnancies in Washington resulted in births and 35% in abortions; the remainder resulted in miscarriages.
- On average, the cost of an unplanned pregnancy is 1.5 times that of a planned pregnancy.

Things to Know

- Washington Medicaid health plans cover almost every type of contraception without a prior authorization.
- Condoms can be obtained at no cost at many locations. Check www.condomfinder.org.
- Men are increasingly more interested in taking part in the contraception discussion. Don't hesitate to ask if they have questions or concerns about family planning.

One Key Question

- Coined by Power to Decide
- Ask women age 18-50 "Would you like to become pregnant in the next year?"
- Tailor conversation to their response. Use resources to address questions. Recommend www.bedsider.org or the app.

Contraceptive Options
